Mosquito-Killer

A bug zapper to plug into power points

Mosquito bites are mostly harmless, but of course we would prefer avoiding any annoying itch. For many people the buzzing sound of a mosquito is just as unpleasant and causes them sleepless nights.

The Gardigo Mosquito-Killer is a compact helper designed for problems with mosquitoes. Simply plug the device into a power point. It attracts flying insects using ultraviolet light and then kills them using high voltage. Activate the device an hour before using the room. Without the distraction of the smell of a human being it is easier for mosquitoes to find their way into the light. For best results, please use the device as described in the manual.

Additional information

- **Dimensions:** 5.5 x 10 x 10 cm (W x H x D)
- **Packaging dimensions:** 10 x 14.5 x 6.5 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, CZ, NL
- **Product images, scenery images**
- **Packaging unit:** 10 units per package
