90° Swivelling Fly Swatter

Easier capture of insects sitting on walls

Insects sitting on walls and ceilings are hard to catch with most electronic fly swatters, as the mesh is mounted at a fixed angle to the handle. The Gardigo 90° Swivelling Fly Swatter has a swivel mounted head that allows turning the grille up to 90° away from the handle. Thus the handle does not get in the way and catching insects sitting on ceilings, walls and windows is far easier.

This electric fly swatters is powered by two AA batteries (not included). The high voltage mesh only gets activated when both buttons are pushed at the same time. This is for your own safety and for the safety of your kids, as accidentally activating the swatter can be prevented. A status LED is a visual indicator that shows that the grid is being powered. The outer grille protects you from accidentally touching the inner mesh.

Additional information

- **Dimensions:** 22.8 x 44.5 x 2.8 cm (W x H x D)
- **Package dimensions:** 22.8 x 44.5 x 2.8 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL, PT
- **Product images, scenery images**
- **Packaging units:** 50 units per package

Specifications

- **Power supply:** 2 x AA batteries (1.5V each) (not included)
- **Two-button-activation**
