Fly Swatter XL

Extra powerful

Problems with flies sitting high on the walls are a thing of the past with the Gardigo Fly Swatter XL. With a total length of over 70cm, this model is the Goliath among fly swatters. Its bamboo handle is very flexible and provides high impact. In addition, bamboo is a particularly fast-growing raw material and thus protects our environment.

A high-quality wire mesh is installed in the head part to eliminate annoying flying insects in the apartment with just one strike.

With a fly swatter you are in control and can target common but annoying flies while sparing important beneficial insects.
