Wasp Repellent Coffee with fragrance blend

Lemon grass incense blend included for a pleasant smell

Our goal is to drive away wasps instead of killing them, but the options are very limited, especially when sweet cakes or savoury grilled meat are on the table. Add cool, sweet drinks and the wasps feel like they are in the land of milk and honey. Our Wasp Repellent Coffee is designed to help you minimize the number of wasps. Put some coffee powder in the bowl and light it. Coffee is a home remedy for repelling wasps that is becoming increasingly popular. The coffee is smouldering. The resulting smoke has a repellent effect on wasps and they will try to avoid the area. To make the coffee smoke smell a little more pleasant, you can add some of the fragrance blend included in the delivery to the coffee powder.
