

Art.-No. 25300

Magnetic Insect Screen for windows

For windows up to 100 x 100 cm

Pesky flies need to stay out, but at the same time you would not want to stop airing the room. With the Gardigo Magnetic Insect Screen for windows, this is easy to achieve. Its sturdy plastic frame can be shortened to match the size of your window. Its high-quality fiberglass fabric is sturdy and UV resistant.

The mesh's dark color makes it nearly invisible when looking out from the inside. The product is fixed to the window with an adhesive magnetic tape – easy to set up without drilling! During the insect free time of the year, the screen can be removed from the window with little effort. The magnetic tape's counterpart is pressed into with the included mounting roller. Comes with illustrated instructions.

The quality mesh can be washed at up to 30 °C for repeated use.

Also available in following sizes:

For windows up to 100 x 120 cm (Art.-No. 25302)

For windows up to 130 x 150 cm (Art.-No. 25304)
