

Art.-No. 25303

Magnetic Insect Screen for windows

For windows up to 100 x 120 cm

In the evening hours on a hot summer's day, one will open the windows to regulate the temperature in one's house or flat. Lured in by the scents of food and humans, mosquitoes and flies will use this chance to get into the house and pester us.

By using the Gardigo Magnetic Insect Screen, you can now place a barrier in their way which they will not be able to overcome.

The screen is made of a high-quality fibreglass fabric – sturdy, long lasting and washable at 30 °C. Its dark colour makes it nearly invisible when looking out from the inside.

The frame can easily be shortened to adapt it to the size of your windows.

The Magnet Insect Screen is fixed to the window with a sticky magnetic tape. No drilling required. To help with inserting the tape's counterpart into the screen frame, a mounting roller is included.

Also available in following sizes:

For windows up to 100 x 100 cm (Art.-No. 25301)

For windows up to 130 x 150 cm (Art.-No. 25305)
