Marten Mat Mobile

Transportable on tour

The Marten Mat Mobile is simply placed on a parking space and the car is parked with its engine bay directly above the mesh.

The mat's uneven surface is unpleasant for the mustelid's sensitive paws. Thus your vehicle will become unattractive without doing the animal any harm.

Marten protection is especially important when you are on the road. If the automobile is parked in several marten territories, different animals may leave their scent marks in the engine compartment. As a consequence, they may think they have to

defend their territory. Damaged cables and hoses – as well as a costly visit at the repair shop – are the consequence.

This is why the Gardigo Marten Mat Mobile can easily be folded to take it with you in the car boot.

The mat is made of 18 separate pieces and has to be assembled before the first use by using the included connecting clips. Perfect for the garage or under the car port as well.
