Cat Repellent

Preventive help

Cats are the most popular pets and are welcome in our houses and gardens, but there are places where they shouldn't be. Especially if they are other people's cats. Using our product you may keep away cats in an eco-friendly way. The Gardigo Cat Repellent emits ultrasound at a frequency of 55 kHz – inaudible to humans, but an unpleasant sound for cats, which is making the area of application unattractive to them. Eventually they will start looking for a quieter place.

The device's infrared motion sensor senses any movement of animals and activates the ultrasound signal automatically. The emitted sound is harmless for humans and animals alike, making our Ultrasonic Cat Repeller an excellent cat defense for your garden.

Additional information

- **Dimensions:** 14 x 8 x 5.5 cm (W x H x D)
- **Packaging dimensions:** 14.3 x 8.5 x 6.5 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL, CZ
