Solar Animal Repeller

Problems with animals in the garden, house or car?

The Gardigo Solar Animal Repeller uses ultrasound and has an adjustable frequency and sensor range, allowing you to target animal problems in a very specific way. In addition, an LED flash light can be activated, which can repel many nocturnal animals. The device's PIR motion sensor only gets triggered by living creatures. This saves power. The included batteries are recharged by a large solar panel or via USB. The Solar Animal Repeller can be set on a flat surface, hung to a wall or stuck into the lawn or a flower pot with its ground spike.

Gardigo Solar Animal Repeller has been tested in the 4/2019 issue of the magazine "Heimwerker Praxis" and was marked 1.4 = value for money: very good

Conclusion: "Mounting the device and putting it into operation was done quickly and easily. It took a little while until it had convinced our local cats to search for a different location to play in. After a while it worked and we assume that it will have a similar effect on other animals" (Dr. Martin Mertens).

Additional information

- **Dimensions:** 9.1 x 38 x 6.5 cm (W x H x D)
- **Packaging dimensions:** 11.5 x 15 x 7.5 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL, PT
- **Product images, scenery images**
- **Packaging unit:** 10 units per package

Gardigo Solar Tiervertreiber Art.-Nr. 60066
Oberklasse

**Heimwerker
Praxis** 4/2019
Preis/Leistung: sehr gut

Specifications

- **Range:** up to 10 m
- **Sound pressure:** max. 85 dB
- **Frequency:**
 1. 19.5 kHz – 23.5 kHz
for cats, dogs and martens
 2. 23.5 kHz – 27.5 kHz
for foxes, boards and game
 3. 27.5 kHz – 31.5 kHz
for mice and other small rodents
 4. LED flash only
 5. all frequencies and LED flash
- **Solar panel**
- **Motion sensor:** 110°
- **LED:** Flash light
- **Batteries:** 3 x 1.2V AA 800 mAh (included)
- **Suitable for wall mount, ground spike included**
- **Material:** ABS
