Solar Animal Repeller Basic

The versatile deterrent

Gardigo's Solar Animal Repeller basic is your environmentally friendly helper for problems with many types of animals. The device has an integrated battery that is charged by the large solar panel on its front. It covers a frequency range between 20 and 36.5 kHz, which animals such as mice, rats, dogs, cats and game can hear, but humans can't. This allows it to be used for problems with various animals, without bothering your neighbours. Additionally, the LED lights can startle animals.

The Solar Animal Repeller Basic has two modes of operation: You can either activate only the ultrasound, or ultrasound and red

and white LED lights at night. The LEDs are extremely bright and look like glowing animal eyes at night. Animals that are scared of predators will be very impressed!

The hanger integrated in the back of the device allows for installing it at exactly the right height for your animal problem.

Bright LED lights look like the scary eyes of a predator at night

Additional information

- **Dimensions:** 6.4 x 12 x 3 cm (W x H x D)
- **Packaging dimensions:** 6.7 x 12.5 x 3.7 cm (W x H x D)
- **Manuals included:** DE, GB
- **Product images, scenery images**
- **Packaging unit:** 100 units per package

Specifications

- **Power:** 0.5 W
- **Rechargeable battery:** 3.7 V, 500 mAh
- **Frequency:** 20 – 36.5 kHz
- **IP code:** IP66
- **Large solar panel**
- **Chargeable via USB (5 V, 500 mA); cable included**
