

Art.-No. 60070

Deer & Wildlife Repeller 360°

Deterrent by blue light

This wildlife repeller emits flashes of blue light, scaring wildlife away from the area. In nature, blue light is extremely rare, so animals recognize it as alien and perceive it as a potential danger. Their eyes are specialized and sensitive to seeing in the dark. The LEDs flash 3 times every 30 seconds. Thanks to the 40 cm long ground spike, the light source is at the eye level of many animals. The device has a twilight sensor and is activated automatically when becomes dark.

Perfect for all places where wildlife such as roe and red deer, boars, rabbits and hares are causing troubles, e.g. gardens, sports grounds, planting beds and cemeteries

The device is battery operated, making it suitable for dark places

Additional information

- **Dimensions:** 48,5 x 8,3 x 8,3 cm (W x H x D)
- **Packaging dimensions:** 49.5 x 8.6 x 8.6 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL, PT
- **Product video, product images, scenery images**
