Water Animal Repellent

Easy to install

The Gardigo Water Animal Repellent is a friendly solution for problems with water-shy animals such as birds, dogs, cats, hares and others in the garden, flowerbeds and fishpond. As soon as an intruder enters the viewing field of the PIR motion sensor, a jet of water is sprayed across the field of view, reaching up to 10 m. The sudden burst of water will scare animals and usually trigger their instinct to flee. At first, they may return after a while, but after a few scares they will learn that the area is not so pleasant anymore and will try to avoid it. The device is particularly well-suited for problems with herons and other large

Additional information

- **Packaging dimensions:** 22.2 x 13.3 x 11 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL
- **Product video, product images, scenery images**
- **Packaging unit:** 10 units per package

birds scavenging fishponds or cats messing up flowerbeds. The Water Animal Repellent can be installed anywhere in the garden, as it operates on 2 AA batteries and only needs the connection of a water hose, which will usually reach every corner of the garden. It can be an environmentally friendly and non-violent way to keep away unwanted animals from certain areas of your garden. The animals are not harmed in any way as the bursts of water only give them a fright to trigger their instinct to flee.
