Pond Protection Grid, Set of 20

To protect your fish

Are you keeping kois, goldfish or carps in your pond? They are an easy prey for herons, cats and raccoons. Protecting your fish starts with planning your pond properly. If you already have a pond in your garden, our pond protection grids are your best bet. Herons and other aquatic birds need a landing surface. Cats are afraid of water and will fish from its edges. Lay out the Gardigo Pond Protection Grid around the edges of your pool to save your fish from these predators. The set contains 20 hexagonal grid modules measuring 31 cm in diameter each and is expandable with additional sets. Clips to connect the modules with each other are included.

Depending on which predators you need to protect your pond from, you may cover the entire surface or just the edges. The grids float just below the surface and are invisible from the outside.

Contents: 20 grids with connections clips

Also available as a set of 40 (Art.-No. 6008440).

Additional information

- **Dimensions:** 27 x 31 cm (W x H)
- **Packaging dimensions:** 31.7 x 27.5 x 5 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL
- **Product video, product images, scenery images**
- **Packaging unit:** 10 units per package
