Anti Collision Bird Stickers – Native Birds

The decorative way of protecting windows

Birds often cannot recognize window panes as obstacles in time. To make glass surfaces better visible for avifauna, you may use our Anti Collision Bird Stickers – Native Birds.

These window stickers have a black backing material and a printed front. Protect the birds outdoors – and enjoy the colourful decoration indoors.

Application:

Before applying the stickers, we recommend cleaning the pane thoroughly using soapy water. With dirt, grease and dust absent the stickers will adhere better. Peel off the backing paper and make sure to not let any parts of the adhesive surface touch one another. Use a soft cloth to smooth the sticker onto the window. By applying gentle pressure, tiny air bubbles underneath the bird protection sticker can be removed.

Additional information

- **Packaging dimensions:** 21.5 x 30.7 x 0.1 cm (W x H x D)
- **Bird sizes:** 11.4 x 13 cm – 20.7 x 13.4 cm (W x H)
- **Manuals included:** DE, GB, FR, ES, IT, NL, CZ
- **Product images, scenery images**
- **Packaging unit:** 250 units per package
