Solar Bird Repellent

A modern alternative to scarecrows

As beautiful as birds are, you probably don't want them in your cherry tree, roof truss or carport. The Gardigo Solar Bird Repellent is designed to avoid damages done by birds, but in a gentle way. It emits an ultrasonic signal ranging between 23 and 50 kHz which is unpleasant for birds, but not unbearable, harmful or even fatal. It helps you pointing birds to areas outside of the device's range.

The animals will unconsciously prefer being in a quieter place. No more birds results in no more soiling of carports, house fronts and eaves. When used as a preventive measure, birds will prefer nesting far from the Solar Bird Repeller. The range of the ultrasound and the motion sensor is approximately 7m. The LED flash light is an additional deterrence to help you protect your property without harming any birds.

Additional information

- **Dimensions:** 11.5 x 12.7 x 7.5 cm (W x H x D)
- **Packaging dimensions:** 12 x 13.5 x 8 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL, PT, CZ, RO
- **Product video, product images, scenery images**
- **Packaging unit:** 24 units per package

The Gardigo Solar Bird Repellent has been rated in the DIY magazine "Heimwerker Praxis" 5/2012 with a 1.6 = Price: good – performance: very good.

"When used on a continuous basis the Gardigo Solar Bird Repellent is very effective under the condition that it is the same birds visiting." (Dipl.-Ing. Gerd Seibring)

Specifications

- **Covered area:** up to 7 m
- **Frequency:** approx. 23 – 50 kHz
- **Solar panel:** adjustable
- **Motion detector:** coverage 110°
- **LED**
- **Rechargeable battery**
- **With on/off switch**
- **Splash-proof**
