Solar Scarecrow

Scares birds with three different sounds

As birds react particularly well to sounds in the range that is audible to humans, gun shot and eagle cry sounds are being used as bird control measures around vineyards and airports. We are using the same principle in our Solar Bird Deterrent with Predator Sounds. The device emits one of three different sounds to repel birds: a dog's bark, an eagle's cry or a gun shot. Switching between sounds every now and then can prevent habituation. The device has a range of up to 65 m².

The output volume of the device is set with a rotary control: soft for residential areas, loud for the use on fields or plantations, e.g. in winegrowing.

The device has a night mode that will mute the sound when it is dark. This allows for silent operation, using only the bright LED flash lights at night.

The AA sized batteries inside the device are charged via the integrated solar panel and can easily be replaced if needed. It is also possible to charge the device with an external power adaptor (not included) through the DC socket, should the weather conditions be unfavourable.

With the included earth spike, our Solar Bird Deterrent can easily be set on any lawn. Alternatively it may be used in a flower pot.

Additional information

- **Dimensions:** 13 x 35 x 16 cm (W x H x D)
- **Packaging dimensions:** 13.5 x 17 x 11.5 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL, PT
- **Product images, scenery images**
- **Packaging unit:** 24 units per package

Specifications

- **3 adjustable sounds:** dog bark, eagle's cry, gun shot
- **4 x LED flash light**
- **Day and night mode selector switch**
- **Volume control**
- **Batteries:** 4 x AA, 1.2 V, 300 mAh, rechargeable (included)
- **DC socket** (charger not included)
- **Solar panel:** 0.1 W, 60 x 60 mm
- **PIR motion sensor**
- **Range:** up to 8 m
- **Angle of detection:** 120°
