Bird Repelling Reflectors, Set of 4

Keep off birds – the professional version of the „CD method“

Are there bird droppings on your garden furniture? Are starlings feeding from your cherry tree? Are herons fishing in your pond? In moments like these you rather wouldn't have any birds around you. But then again you enjoy their singing on a sunny spring morning after a gloomy winter. The Gardigo Bird Repelling Reflectors help you to find a good balance between the two extremes. Protect your patio, cherry tree and pond by hanging up the discs, while allowing birds to visit other trees in your garden.

The set contains 8 stainless steel mirror discs which rotate in the wind and reflect light. This startles birds and they will search for a less dangerous place to stay.

Additional information
