Anti Collision Bird Stickers – Exotic birds

Decorative window stickers

Birds often do not recognize window panes as obstacles. To make glass surfaces visible for your feathered friends and to prevent collisions, simply apply our bird stickers to the inside of the window.

The anti collision stickers have a black, sticky backing. On the inside they are colourfully printed with exotic bird motives. Protection on the outside, decoration on the inside.

Application:

Before applying the stickers, we recommend cleaning the pane thoroughly using soapy water. With dirt, grease and dust absent, the stickers will adhere better. Peel off the backing paper and make sure to not let any parts of the adhesive surface touch one

another. Use a soft cloth to smooth the sticker onto the window. By applying gentle pressure, tiny air bubbles underneath the bird protection sticker can be removed.

Additional information

- **Packaging dimensions:** 21.5 x 30.7 x 0.1 cm (W x H x D)
- **Bird dim.:** 10.7 x 12.8 cm – 28.8 x 20.4 cm (W x H)
- **Manuals included:** DE, GB, FR, ES, IT, NL, PT, CZ
- **Product images, scenery images**
- **Packaging unit:** 250 units per package
