Solar Pigeon-Repeller Crow

The crow as a natural enemy of songbirds

This lifelike dummy crow makes use of the natural instincts of pigeons and other small birds. Just the sight of it is terrifying for these animals, because ravens and crows are their natural enemies, from which they will keep their distance. If an animal approaches, the radar sensor is triggered and the dummy emits a realistic crow sound. The solar panel supplies the integrated battery with electricity. Just place the crow in a sunny spot. The effect is activated with a switch and can be turned off at night, so that neighbours don't feel disturbed. Included is a ground spike for placing the crow on the ground or in a flowerpot. Protects facades of buildings, cornices, window sills, roofs, balconies, carports, gardens and vegetable patches.

Additional information

- **Dimensions:** 13 x 23 x 41 cm (W x H x D)
- **Packaging dimensions:** 13.5 x 42.5 x 12.5 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL
- **Product images, scenery images**
- **Packaging unit:** 6 units per package

Specifications

- **Battery:** Li-Ion; 3.7V; 1200 mAh
- **Motion sensor:** Radar (detects movements from all directions, range: approx. 4 m; Frequency: 2.7 GHz)
- **Power:** 20 mW
- **Protection class:** IP55
- **Solar panel**
- **Speakers on the front**
- **On-/off switch**
- **Ground Spike**
