

Art.-No. 60133

Pigeon Repeller

With sound & batteries

Ravens and crows are natural enemies of pigeons and other smaller birds. They are therefore easily impressed by a naturalistic dummy.

With its infrared motion sensor, the Gardigo pigeon deterrent detects the motion of the animals and then emits a realistic crowing noise.

A ground spike is included in the scope of delivery, with which the crow can be fixed, for example, in the flower box on the balcony, or in the garden. Alternatively, you can spike can be stuck into the crow's back to let it hang from a nylon string from the hanging hook. A moving crow is particularly threatening to small birds and they will search for a less dangerous place.

Additional information

- **Dimensions:** 13 x 20 x 40 cm (B x H x T)
- **Packaging dimensions:** 10 x 40 x 11 cm (B x H x T)
- **Manuals included:** DE, GB, FR
- **Product images, scenery images**
- **Packaging unit:** 10 units per package

Specifications

- **Covered area:** up to 10 m
- **PIR motion sensor**
- **Batteries:** 2x AA, 1.5 V each (included)
- **Easy installation with ground spike**
- **Hanger hook**
