

Art.-No. 62304

Flying Insect-Killer 20 m² with UV-LED

Kills mosquitos with high voltage

Mosquitoes not only bug you with their incessant buzzing, they also bite! Most kinds of mosquitoes prefer to be active at dusk; they come out of their hiding places and are attracted to light and smells. To avoid being awake half the night hunting them down, you should take preventive measures and get rid of any insects in your rooms. Our Gardigo Flying Insect-Killer with UV-LED light will help you do so. Close the windows and switch the appliance on about 60 minutes before using the room. The UV-LED lamp with its special ultra-violet light (365 nm) will attract flying insects which are then killed quickly and painlessly by the integrated high voltage mesh.

Attention: For indoor use only! Outdoor use violates the Federal Species Protection Act!

Additional information

- **Dimensions:** 15 x 23 x 10.5 cm (W x H x D)
- **Packaging dimensions:** 15.5 x 23.1 x 11 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL
- **Product video, product images, scenery images**
- **Packaging unit:** 10 units per package

Specifications

- **Covered area:** approx. 20 m²
- **High voltage:** approx. 1000 V
- **UV light:** 365 nm
- **Current consumption:** approx. 0.5 W
- **Voltage:** 230 V/50 Hz
- **With on/off switch**
