Flying Insect-Killer 25 m²

The compact bug zapper for small flats

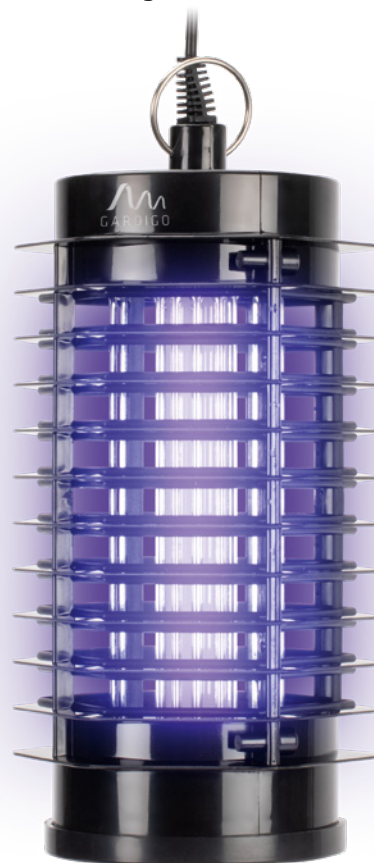

The Gardigo Flying Insect-Killer 25 m² attracts many different kinds of pesky flying insects with ultra-violet light, to kill them quickly and painlessly on the integrated high voltage grille. The device can be set on an even surface or suspended from the ceiling. A hanger ring is integrated into the device.

The collecting tray is easily removed for emptying and cleaning.

Especially during summer, when windows are kept open in the evening hours for a cool draught, insects in the apartment are quickly becoming an issue. No one likes itchy bites and flies can become real problem for hygiene.

We recommend using the device in the darkest part of the room, preferably without distraction by human scents. This allows the insects to find their way into the light more quickly.

Attention: The function of attracting flying insects is only given to insects that react to light.

Additional information

- **Dimensions:** 10.5 x 21 x 9.5 cm (W x H x D)
- **Packaging dimensions:** 11.5 x 23 x 10.5 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL, PT
- **Product images, scenery images**
- **Packaging unit:** 10 units per package

Specifications

- **Covered area:** approx. 25 m²
- **High voltage:** approx. 1000 V
- **UV LEDs**
- **Current consumption:** approx. 1W
- **Voltage:** 220 – 240 V~ /50 Hz
