Rat Trap, Set of 5

Sturdy and re-usable

Our snap traps are easy to set: simply push down the tensioning bar. As rats like to run along walls, the ideal place for a trap would be by the skirting. To catch rodents regardless of their walking direction, place the traps with the bait and trigger plate directed towards the wall. Place the bait in the center hole of the plate. Chocolate or hazelnut spread are tried and tested baits. You may also use peanut butter or liver sausage. Then tension the trap.

Our traps are made from a durable synthetic material which is easy to clean, making them re-usable for years and years to come. Push down the tensioning bar to release a rat from the trap. No touching of the animal is required!
