Mouse Live Trap XL 2.0

Spacious and transparent

This live mousetrap is spacious and therefore particularly humane because the animals do not panic or catch their tails in the trap door. The bait area in the back of the trap is suitable for solid and spreadable bait as well as for water. The trap is made of plastic, making it easy to clean. The edges and openings are reinforced with metal as a protection from strong mouse teeth. For light mice, that might eat the bait without triggering the trap, we recommend laying a coin on the trigger.

Important: Check the trap regularly (at least every 2 hours) in order not to panic the animal unnecessarily!
