Mousetrap 'precision', Set of 2

Humane through accuracy

This mouse trap is a bit more complex than conventional traps and has a great advantage: the mouse has to lift the bait cover to get to the bait, which in turn triggers the strike bar. Emptying the bait cup without triggering the trap is a thing of the past. In addition, the animal is well positioned so that it can be hit in the right place and with the greatest possible impact force by the strike bar, for a precise catch.

Mousetraps are usually placed by the wall, because this is where the rodents feel safe and have their paths. It is ideal to place two traps directly next to each other, each with the strike bar facing outwards, to be able to catch mice coming from either direction.

We recommend chocolate and hazelnut spread or peanut butter for bait.

Plastic mousetraps can be easily rinsed with water for repeated use.

Additional information

- **Dimensions:** 5 x 10 x 10.3 cm (W x H x D)
- **Packaging dimensions:** 13 x 17 x 3.8 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL
- **Product images, scenery images**
- **Packaging unit:** 10 units per package
