

Art.-No. 62387

Rat Trap Protector Box including two wooden rat traps

Catch rodents discreetly

Rat traps should never be lying about in the open. Birds, hedgehogs, pets and even children may try to get to the bait and could get hurt. Our Rat Trap Protector Box makes the use of snap traps safer. Two wooden traps are included in the delivery, but our plastic traps (Art.-No. 623445) are compatible as well. For additional safety, it is possible to secure the trap to the box with screws (screws not included). The box's smooth surface (on the inside as well as the outside) makes cleaning easy.

As the box has openings on both sides, rats can look through it, which increases the chance that they will enter the box. Rats are very cautious and may not enter closed boxes. Having two openings allows catching rodents from either direction.

Use: Simply place the Rat Trap Protector Box on a pathway that rats frequent, usually along a wall. Place the baited traps inside the box, tension them and fasten the lid by using the included eyelet screw.

Additional information

- **Dimensions:** approx. 50 x 14.5 x 10.5 cm (W x H x D)
- **Product video, product images, scenery images**
- **Packaging unit:** 1 unit per package
