Flying Insect Killer Professional 150 m²

Professional protection for indoors

The Gardigo Flight-Insects Professional 150 m² quickly eliminates irritating mosquitoes, flies and gnats that are around the house or at work, just waiting to annoy us. It is a great device to clean up living rooms and bedrooms in the evening. Offices and kitchens, where flies and gnats are attracted by the smell of food or the warm air, will become pleasant places again. You can do your work and enjoy your food without having to continuously swipe at flies.

The special light of the UVA tubes attracts many types of insects. They are then killed quickly and painlessly by the integrated high-voltage grid.

The dead insects fall into a tray mounted at the bottom of the lamp. The tray is easy to remove for emptying and cleaning. The brightness of the UVA tubes will attract insects in an area of up to 150 m². The Flight-Insects Professional 150 m² is delivered with

two UV lamps. Depending on the location this product can be hung to a wall or placed on a table. Even ceiling mount is possible.

Attention! For the protection of our environment and for the safety

of endangered protected species, UV lamps with high-voltage grids may only be used indoors.

Additional information

- **Dimensions:** 65.9 x 28.7 x 9 cm (W x H x D)
- **Packaging dimensions:** 66.9 x 28.7 x 9.5 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL, PT
- **Product video, product images, scenery images**
