Humane Rat Live Cage Trap

Made in Germany

The humane way to catch a rat

Many people have problems with rats around the house, because rats are synanthropes and can easily adapt to different environmental conditions.

According to the motto „live and let live“ you can catch the rodents with our Rat Live trap instead of killing them. Simply set them free at some distance.

The bait (chocolate and hazelnut spread or peanut butter) can simply be placed behind the trigger hook. The trap is tensioned. The rat will touch the trigger on its way to the lure. The door will shut and the rodent is caught.

This rat trap is made in sheltered workshop in Germany. This allows persons with disabilities to find a meaningful employment in a supported environment and helps them to fully participate in society.

The Rat Live Trap is also suitable for catching mice.

Please check the trap for caught rodents regularly and set rats free in 20 km distance, so they can't find their way back.

Additional information

- **Product dimensions:** ca. 29 x 12.2 x 11.2 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL, CZ
- **Product images, scenery images**
- **Packaging unit:** 18 units per package
