Slug Stop Fleece

Virgin sheep's wool, 500 x 10 cm

Our Slug Stop Fleece, made of virgin sheep's wool, creates a natural barrier to keep slugs away from your garden beds. The special fiber structure of the wool forms a surface that slugs find difficult to cross. Additionally, the fleece absorbs moisture from the slugs, further discouraging them.

Application is simple: Just place the fleece around garden beds, raised beds, or plant containers to create a physical boundary. At the same time, it acts as a mulch material, retaining moisture and improving soil conditions. Over time, the wool gradually decomposes, enriching the soil.

This fleece is an eco-friendly and gentle alternative to chemical slug repellents, as it is 100% biodegradable. Perfect for natural gardens that avoid artificial additives. Protect your plants now!

Additional informations

- **Product dimensions:** 500 x 10 cm (W x H)
- **Packaging dimensions:** approx. 15 x 10 x 15 cm (W x H x D)
- **Product description:** DE, GB, FR, ES, IT, NL, PT
- **Product images, scenery images**
- **Packaging unit:** 10 units per package
