Wasp Trap with attractant, Set of 2

Ban the wasps from your garden

Made in Germany

Do you have fruit trees in the garden full of wasps eating away at the ripe fruit? Do you want to sit on your terrace and enjoy your meal in peace and quiet? Wasps are attracted by food and beverages and disturb us by their presence. You have to be careful not to get stung. Also playing children are often victims of wasp stings. Wasp stings are painful and very dangerous to people with allergies. Put an end to this harassment from wasps by installing the Gardigo wasp traps with a luring liquid to attract and catch the wasps.

Instructions: Mix 10 ml of the wasp attracting liquid with 100 ml of water, add 2 to 3 drops of washing-up liquid and place it all into the trap. The sweet scent lures the wasps from below into the trap. The special construction of the upper and lower shell of the trap does not give the wasps a chance to get away again. If you place the trap near your patio table, you will find that the wasps prefer the trap to your food. The trap can also be set up in your fruit trees, keeping the wasps away from the ripe fruit.

Contents: 2 Traps, 2 hanging cords, 100 ml of wasp attracting concentrate.

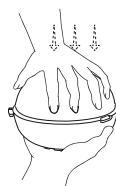

Ingredients: Fruit extracts, water, organic acids.

Attractant also available individually (Art. No. 66653).

Keep away from children!
