## Fruit Fly Trap Apple, Set of 3

Decorative and useful

Every household has problems with fruit flies. This decorative trap catches the annoying insects by using two different methods: The lower shell is filled with a liquid and used as a lure to drown the insects. The adhesive film-trap in the lid catches flying fruit flies.

### Application:

1. Lift the lid and remove it from the trap. If necessary, you must turn the lid to the free-lock position by turning it slightly.
2. Fill the lower shell about halfway with liquid lure.
3. Remove the protective foil from the adhesive surface in the lid.
4. Slide the lid onto the hinge of the trap to the desired height and turn it 90 ° until it is firmly set.

5. Exchange liquid and peel off the adhesive film if a number of fruit flies have been caught. The trap comes with three adhesive sheets stacked on top of each other. Under the first adhesive film is the protective film of the second adhesive film.

**Note:** The more the trap is opened, the more efficient the distribution the smell of the liquid lure. If the trap is only opened a little it is harder for the lure to attract the fruit flies. Try out which setting is most successful.

### Additional information

- **Dimensions:** 9 x 10.9 x 9 cm (W x H x D)
- **Packaging dimensions:** 11 x 28 x 9.5 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL
- **Product images, scenery images**
- **Packaging unit:** 40 units per package
