Wasp Nest Premium, Set of 2

Water-resistant dummy vespiary

Prevent wasps from building their nests around your house, garage or gazebo! Wasps keep a distance of up to 75 m from someone else's nest. This fake nest simulates an actual nest for the insects. This allows you to keep them away without using poison or doing harm to the insects.

It's best to use our Premium Wasp Nest as early as spring, before wasps start building their nest. Wasps' nests are usually found in sheltered spots such as under the eaves, because they are made of a paper-like substance. Such places are perfect for setting up the decoy. It is made of a water resistant material for a long life.

Setting up the Wasp Nest Dummy:

1. Open the wasp nest dummy carefully by pulling it apart.
2. Insert the wire frames into the larger hole of the wasp nest.
3. Tension the dummy by gently bending the wires to insert all four of its feet into the metal rings.
4. Hang the wasp nest into a tree, under the eaves or a place where wasps are likely to build their nest.

Note: Do not subject the wasp nest dummy directly to rain or wind. Place the nest at a distance of at least 2 to 4 m from food sources and at 2 to 2.50 m height.

Additional information

- **Dimensions:** approx. 20 x 30 x 20 cm (W x H x D)
- **Packaging dimensions:** 22.8 x 34.5 x 2.2 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL, PT, CZ
- **Product video, product images, scenery images**
- **Packaging unit:** 50 sets per package
