Box Tree Moth Trap

Insecticide-free early detection

The Gardigo Box Tree Moth Trap is a monitoring trap for observing the box tree moth infestation in your garden. Attractant for an entire garden season is included in the delivery. It attracts box tree moths in a range of up to 180 m². The pest insect is an invasive species of Asian origin and is starting to cause severe problems in Europe. They have no natural predator here. As the

moths prefer to lay their eggs into box trees that are not infested yet, they spread at a rapid speed. This makes monitoring very important. The manual includes a chart into which the number of caught insects can be filled in. From this infestation diagram you can see when counter-measurements need to be taken.

The trap has string from which it can be hung as well as a holder in its bottom. The latter is for putting it onto a flower support stick or stake. .

Keep out of reach of children. Use only according to instructions. We accept no liability for the consequences of improper use.

Contents: Box Tree Moth Trap, 4x pheromone dispenser

Additional information

- **Dimensions:** Height: 22 cm • Ø 11 cm
- **Packaging dimensions:** 11.7 x 12.5 x 11.7 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL, PT
- **Product video, product images, scenery images**
- **Packaging unit:** 10 units per package
