Yellow Sticky Traps, Set of 5

Pest protection for house plants

Protect your potted and balcony plants from pest insects! Aphids, sciarid flies and leaf miner flies, which all feed on leaves and plant sap, can be lured into a sticky trap by an intense yellow colour.

Our Yellow Sticky Traps are designed to be used in flower pots and window boxes. Stick them into the soil in spring and remove the protective paper. Even if there is water or sunlight, the glue traps will be sticky for several months. It is best to leave the adhesive traps in the flower pot for the entire summer. As soon as the flying insects stay away in autumn, you may remove the glue boards.

Use our Yellow Sticky Traps to discover, monitor and control infestation!

Additional information

- **Dimensions:** 16 x 5 cm (W x H)
- **Package dimensions:** 6 x 20.5 x 1.5 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL
- **Product images, scenery images**
- **Packaging unit:** 12 units per package
