

Art.-No. 668043

Cockroach Trap, Set of 3

Monitoring system – detect infestation early on

Cockroaches are omnivores and feed on all kinds of organic materials. Once a room is infested with the pantry pest, it is hard to get rid of. The insects are nocturnal and only active in the dark. For this reason, an infestation is often only recognized when it is well advanced. Roaches can spread pathogens and will cause serious hygiene problems, especially in professional kitchens, restaurants, bars, pubs, hotels and hospitals. Preventive monitoring is especially important in these locations.

Additional information

- **Dimensions:** 8 x 12.5 x 1.7 cm (W x H x D)
- **Packaging dimensions:** 9.3 x 14.4 x 2 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL
- **Product images, scenery images**
- **Packaging unit:** 12 units per package

Use:

1. Unfold the trap and peel off the protective foil from the sticky surface.
2. Fold the sides and assemble the trap as shown.
3. Put the trap in a place where you suspect an infestation. The insects prefer humid and warm environments. The protective foil at the bottom of the trap can be removed to stick it to the floor.
4. The product can be disposed of with household waste.

Attention! If medical advice is needed, have packaging or label available as reference. Keep out of reach of children.
