Yellow Stickers, Set of 6

Monitoring traps

Gardigo yellow sticky traps are product for monitoring plant pests such as leaf miner flies, white flies, fungus gnats and winged greenflies. The fly paper's yellow colour is attractive for many kinds of insects and lures them into a sticky trap. Insects can be caught in an insecticide-free way and without poison.

Plant pests often get into the house with contaminated potting soil. The plants get infested by repotting. With the fungus gnat traps you may catch them now to monitor the infestation and take further action if necessary.

Simply stick the fly paper traps into to a flowerpot and remove the protective foil. The bug trap's glue is odourless to humans.

Additional information

- **Dimensions:** 6 x 10 cm (W x H)
- **Package dimensions:** 9.5 x 20.5 (W x H)
- **Instructions included:** DE, GB, FR, ES, IT, NL
- **Product images, scenery images**
- **Packaging unit:** 12 units per package
