## Fly-Scare Glass

For open windows and doors

The Fly-Scare glass is an innovative way of repelling flies, originating from South America. Clear plastic bags filled with water are being used there for keeping away pesky insects. The Gardigo Fly-Scare Glass is based on the same principle, but uses a beautiful, decorative glass orb instead of a bag.

Simply fill the orb with water, so that it can cause a variety of optical illusions. It works like a prism and can disperse the light like into individual colours (also known as the rainbow effect). Its

drop shape will enlarge like a magnifying glass. Flies will find the inverted, enlarged image of objects behind the glass irritating. When they fly towards it, it will look like a moving object. The insects will try to avoid it.

**Use:** Fill the Gardigo Fly-Scare Glass with water and hang it in an open window, patio or balcony door.

### Additional information

- **Dimensions:** 10 x 20 cm (W x H)
- **Packaging dimensions:** 10.5 x 20.5 x 10.5 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL, PT
- **Product images, scenery images**
- **Packaging unit:** 24 units per package
