Mouse Repeller Mobile

Disturbs hungry rodents

Rodents such as mice and rats have a great sense of hearing, as they communicate with each other using ultrasonic tones, which are inaudible to humans. The Gardigo Mouse Repeller Mobile emits the same kind of ultrasound to be a nuisance for the animals. The device will quickly become annoying and the pest will try to find a quieter place.

The Gardigo Mouse Repeller Mobile is powered by 4 AA batteries (not included). This allows you to use it wherever you are having troubles with mice – no socket outlet required. Perfect for attics, carports, basements, sheds, pavilions, garages or storage spaces.

Alkaline batteries will power the device for approx. 10 weeks. Of course you may also use environmentally friendly rechargeable batteries.

Additional information

- **Dimensions:** 8.2 x 8.2 x 3.7 cm (W x H x D)
- **Packaging dimensions:** 9 x 12.2 x 4.5 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL, PT
- **Product video, product images, scenery images**
- **Packaging unit:** 60 pieces per unit
