Mosquito-Repellent

For keeping stinging mosquitoes away

Mosquito bites are a nuisance. They swell, get red and itch. Scratching only makes things worse. Now you can do something to prevent midges from biting you! The Gardigo Mosquito-Repeller is designed to fend off gnats using high frequency sound. The tone of this device is modelled after the wing beat frequency of male mosquitoes willing to mate. Fertilized, blood sucking female midges avoid this sound and will try to leave the area in

which it is audible. This sonic repeller is hardly any larger than a power outlet and designed to look unobtrusive, yet modern.

Also available as a set of 2 (Art.-No. 669852).

Also available for problems with:

Mice
Art.-No. 66986

Spiders
Art.-No. 66987

Ants
Art.-No. 66988

Silverfish
Art.-No. 66990

Additional information

- **Dimensions:** 6.5 x 6.5 x 6.8 cm (W x H x D)
- **Packaging dimensions:** 7.5 x 14.5 x 7 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL
- **Product images, scenery images**
- **Packaging unit:** 40 units per package

Specifications

- **Covered area:** approx. 25 m²
- **Frequency:** approx. 7 kHz
- **Current consumption:** 0.2 W
- **Current:** 0.9 mA
- **Voltage:** 220 - 240 V/50 - 60 Hz
- **Operating display (LED)**
- **Material:** ABS
