Mini Mole Repellent

All-season use

The Mini Mole Repellent is the compact helper for problems with ground burrowers such as moles and voles. Its slim design with the sturdy metal tube makes it easy to use: It can simply be stuck into many types of soil without having to dig a hole first. The effectivity of a mole repellent is not dependent on its size. The important thing is the efficiency of its buzzer.

This is what the Gardigo Mini Mole Repellent uses to send tones

at a frequency of 400 Hz into the soil, which are unpleasant for the animals. In their dark underground tunnels, moles have to rely on their acute sense of hearing to find their prey.

The Mini Mole Repellent is battery operated, which makes it ideal for the dark time of year or for the use in shady gardens.

Thanks to the battery change cylinder, it is not necessary to pull the device out of the ground for swapping batteries.

Additional information

- **Dimensions:** 4.5 x 22.5 x 4.2 cm (W x H x D)
- **Packaging dimensions:** 5 x 23.2 x 5 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL, PT
- **Product images, scenery images**
- **Packaging unit:** 50 units per package

Specifications

- **Covered area:** approx. 700 m², depending on soil conditions
- **Frequency:** approx. 400 Hz
- **Interval switching:** 2 sec. on/32 sec. off
- **Battery:** 2 x AA Mignon alkaline batteries (not included)
- **With battery change cylinder**
