Vole Trap Accessory Set

Find, mark & set traps

Setting up vole traps can be really difficult – if you do not have the right tools. The Gardigo Vole Trap Accessory Set makes this tedious task easier than ever before! Use the metal probe rod to find the underground tunnels. Voles dig right underneath the lawn surface to be able to feed on the roots of your plants. Where the probe rod is easy to stick into the ground at first and then harder to move, you have successfully found a tunnel. To be sure, try to find the further course of the tunnel and mark it with the flags. Then use the hole digging tool to make a hole into which the Gardigo Vole Traps (Art.-No. 70072; available separately) will fit precisely. This is important, as neither light nor air should get into the tunnel at the gap between the trap and the earth. Otherwise the vole may try to dig earth towards the trap, trying to

fix the hole in its tunnel. Working precisely with the hole digging tool will also keep the damages to your lawn to a minimum. It is best to fill the earth and punched out turf into a bucket. After a successful catch, you can fill the hole again.

Additional information

- **Dimensions:**
 - Metal probe rod:** 3.8 x 25.3 x 3.8 cm (W x H x D)
 - Hole digger:** 12.9 x 28 x 6.7 cm (W x H x D)
 - Four flags:** 6 x 25.7 x 0.6 cm (W x H x D)
- **Packaging dimensions:** 18.8 x 18.8 x 5.5 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL
- **Product images, scenery images**
- **Packaging unit:** 16 units per package
