Solar Mole Repellent “drill”, Set of 2

Screws easily into the ground

With this mole deterrent from Gardigo, the days of laboriously digging a narrow hole are finally over! Instead of a simple pole, this device has a drill tip for screwing it directly into the ground. The integrated solar panel supplies the device with electricity throughout the entire gardening season.

The device simulates seismic waves underground. This is disturbing for moles, because they have to rely on their sense of touch in their dark tunnels. The vibrations can hardly be heard above ground. Perfect if you want to enjoy the peace and quiet in the garden or have sensitive neighbours.

The device automatically alters between three different operating modes in 24 hour intervals in order to prevent the habituation effect. In addition, the device has a power switch to turn it off from time to time.

Additional information

- **Dimensions:** 6.9 x 24.8 x 6.5 cm (W x H x D)
- **Packaging dimensions:** 7.5 x 25.5 x 7 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL, PT
- **Product video, product images, scenery images**
- **Packaging unit:** 48 units per package

Specifications

- **Covered area:** up to 1250 m² per device
- **Solar panel:** 4.5 V, 45 mA
- **Operating voltage:** 45 – 55 mA
- **Ingress protection:** IP65
- **Battery:** 3.7 V, 200 mAh
- **Integrated drill tip for easier usage**
