Solar Mole Repellent Screw

Easily insertion into the soil

The Solar Mole Repellent Screw by GARDIGO emits sounds into the ground to deter moles and voles. Thanks to its integrated screw thread, it has never been easier to install a mole repellent! The device is simply screwed into the ground and, unlike other devices, requires additional tools only for extremely stubborn soil – for example, soil with large stones. This design also has the advantage of securely anchoring the device in the ground, allowing the sounds to be optimally transmitted into the soil, where they effectively disturb the burrowing animals.

The built-in solar panel powers the repellent screw, making it ideal for sunny gardens! We recommend using mole repellents strategically: Start near your house and regularly move the device toward the property boundary to drive the animals toward neighbouring areas.

Additional information

- **Dimensions:** 6.3 x 25.5 x 6.8 cm (W x H x D)
- **Packaging dimensions:** 7,2 x 26,5 x 6,7 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL, PT
- **Product images, scenery images**
- **Packaging unit:** 50 units per package

Specifications

- **Reach:** up to 700 m²
- **Frequency:** 400 Hz ± 100 Hz
- **Battery:** 1.2V, 80 mAh (Ni-Mh button cell)
(permanently installed)
- **Solar panel:** 2 V/40 mA
- **With ON/OFF-switch**
- **Material:** ABS
- **Protection code:** IPX4
