Vole Pliers Trap

A classic vole trap

Voles in the garden are an incredible annoyance for any hobby gardener because they burrow through the soil, undermine the grass and eat the roots of the plants which will die as a consequence. If you have voles in your flower beds they will gradually destroy all plants leaving an unsightly garden. We have just the right tool to help you getting rid of voles! Getting rid of voles has never been so easy. The Vole Pliers Trap is set and placed vertically into the entrance of the tunnel of the vole. Chasing the voles off your compound is no longer necessary because the trap will catch the vole and it can then be disposed of. As soon as the vole comes into contact with the trap it is triggered. The vole is

immediately killed without pain. The trap can be re-used many times. The double sided entry increases the chance of catching a vole and the strong pliers make sure that it cannot escape.

The trap is made from galvanized steel and highly resistant to corrosion.

Additional information

- **Dimensions:** 10.5 x 18 x 8 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL, PT
- **Product video, product images, scenery images**
- **Packaging unit:** 24 units per package

Also available as a set of 4 (Art.-No. 70074).
