Vole-Trap

Re-usable

Voles dig through the soil and destroy roots of plants and vegetables. They move through their underground tunnels in search of food and that is the place where the Gardigo Vole Trap is installed. With little effort the trap can be tensioned within seconds. As soon as the vole moves the trigger pin of the trap, it shuts and catches the ground digger. The trap is designed so that voles can be caught coming from either direction. The position of the tensioning lever indicates whether a vole has been caught.

Also available as a set of 3 (Art. No. 700723).

Additional information

- **Dimensions:** 6.1 x 24 x 6.1 cm (W x H x D)
