Flea Comb Bzzz

Get rid of fleas

Is your pet suffering from fur parasites? Despite careful grooming, cats and dogs can catch annoying fleas. These insects are hard to get rid of. The electronic Flea Comb Bzzz is designed to clean your cat's or dog's fur from all blood sucking parasites. Its teeth are charged with high voltage which kills fleas, their larvae and eggs. Subsequently, their remains are removed from the fur using the yellow plastic comb at the top of the device. The charge is harmless to humans and pets and barely noticeable.

Operation:

Remove the rear shell of the device to insert two AAA batteries. The device signals correct insertion of the batteries with a short tone. Then put the shell back on. Remove the protective cap from the bottom of the device. Press and hold the power

button until the LEDs light up. A signal tone emitted in 4-second intervals confirms charge status and operational readiness. Now comb through your pet's coat using the metal teeth in order to kill fleas in all their developmental stages. Use the yellow comb afterwards to remove what is left of the insects. In case the device emits a continuous tone, please switch it off by holding the power button. Clean the teeth using the included brush and make sure that adjacent teeth do not touch.

Additional information

- **Dimensions:** 7 x 8 x 2.8 cm (W x H x D)
- **Packaging dimensions:** 7.2 x 8.8 x 3.3 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL
- **Product images, scenery images**
- **Packaging unit:** 48 units per package

Specifications

- **Power button**
- **LED light**
- **Batteries:** 2 x AAA (Micro; included)
- **Operating voltage:** 3 V
