Marten Repellent Car

Simply connect it to your car battery

Dry breadcrumbs and gnawed-on cables in the engine compartment are always an indication that a marten has moved in. Especially during the cold season it will feel very comfortable in close proximity to the warm engine and will eventually consider it to be part of its territory. Once it has settled down it is quite difficult to get rid of the animal again. It has left its scent marks and will always find back. There is only one thing that will really help: a thorough wash of the engine compartment. To prevent

further visits, you could use the Gardigo Marten Repellent. The device is easily connected to the car battery and has a low power consumption due to its new electronics. The device emits a high-frequency sound at intervals of 15 seconds on and off. The sound is barely perceivable to the human ear but will turn your vehicle into an unpleasant place for martens.

Additional information

- **Dimensions:** 9 x 5.5 x 2.5 cm (W x H x D)
- **Packaging dimensions:** 8 x 14.3 x 3.9 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL, CZ
- **Product video, product images, scenery images**
- **Packaging unit:** 10 units per package

Specifications

- **Frequency:** 12 kHz +/- 10 %
- **Frequency interval:** 15 sec. on/15 sec. off
- **Sound pressure:** approx. 85 dB
- **Connection cable:** approx. 50 cm
- **Fine wire fuse:** 200 mA
- **Current:** 7 mA
- **Current consumption:** approx. 0.1 W
- **Voltage:** 12 V DC
- **Power indicator (LED)**
