Marten Repellent Car

A disturbance for sharp toothed martens

Marten Repellent Car uses a high frequent acoustic signal to disturb martens and to turn your vehicle into an unpleasant place for the animals. In 15 second intervals, it emits tones that are hardly perceptible for human ears, but very unpleasant for more sensitive marten ears.

Marten Repellent Car is powered by the car battery. To save power, the device turns off as soon as the ignition is turned on.

We recommend using Marten Repellent Car as a preventive measure. After all, you would like to avoid costly repairs. Where martens have made themselves comfortable, it takes additional effort to repel them.

When there are scent marks in the engine bay, the marten will always try to return and mark its territory over and over again. One the car parks in another marten's territory, trouble is sure to follow. This is when hoses, cables and isolation get attacked. When there is known marten infestation, a thorough motor wash is necessary before installing the device. Once this is done, Marten Repellent Car can be put into operation.

Additional information

- **Dimensions:** 10.2 x 7.1 x 2.2 cm (W x H x D)
- **Packaging dimensions:** 9.2 x 12 x 3.9 cm (W x H x D)
- **Instructions included:** DE, GB, FR, ES, IT, CZ, NL
- **Product images, scenery images**
- **Packaging unit:** 60 pcs/package

Specifications:

- **Frequency:** 12 kHz
- **Interval:** 15 sec. ON/15 sec. OFF
- **Sound pressure:** approx. 78 dB
- **Connecting cable:** approx. 50 cm
- **Miniature fuse:** 200 mA
- **Current:** 2 mA
- **Power consumption:** approx. 0.1 W
- **Operating voltage:** 12 V DC
- **Power indicator (LED)**
