Marten Repellent Ultra

Inaudible to human ears

The Gardigo Marten Repellent Ultra emits an ultrasonic frequency of 23 kHz at intervals of 15 seconds. Martens perceive these frequencies as very disturbing and unpleasant and will try to avoid the vehicle that is the source of the sound. The human ear

is not capable of hearing these high frequencies and does not perceive them as a disturbance. The integrated technology ensures a constant and stable frequency output. The repellent is connected directly to the car battery.

Additional information

- **Dimensions:** 11.5 x 6.8 x 3.6 cm (W x H x D)
- **Packaging dimensions:** 8.5 x 15 x 4.5 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL, RO
- **Product images, scenery images**
- **Packaging unit:** 10 units per package

Quartz Controlled:

For a stable frequency and consistent intervals

Specifications

- **Frequency:** 23 kHz +/- 10 %
- **Sound pressure:** approx. 80 dB
- **Radiation angle:** approx. 160°
- **Connection cable:** approx. 50 cm
- **Fine wire fuse:** 250 V/0.2 A externally
- **Current:** approx. 0.7 mA
- **Power consumption:** approx. 0.1 W
- **Voltage:** 12 V DC
- **Operating display (LED)**
