Marten Shock Mobile

Your versatile helper for marten problems

Marten Shock Mobile is a triple defence for your marten problem. Most people are familiar with a sonic marten deterrent's mode of operation: A high frequent tone, which martens can hear very well, makes engine compartments uncomfortable for the pesky biters, protecting your leads and hoses. Marten Shock Mobile emits an acoustic signal of varying frequency to avoid a habituation effect. If the marten should not be deterred by the noise, it will receive a weak, but very impressive electric shock when it steps on the contact plates located at the front of the device. The marten deterrent has an additional LED flash light to irritate the animals. As the device is battery operated, setting it up is quite easy: Simply place it in the engine bay and affix it by using the included cable ties or self tapping screws. Marten Shock Mobile has an integrated vibration sensor and will switch off automatically during a ride, saving you battery power.

Additional information

- **Dimensions:** 8.5 x 10.5 x 4 cm (W x H x D)
- **Packaging dimensions:** 8.8 x 18.3 x 4.8 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL
- **Product images, scenery images**
- **Packaging unit:** 10 units per package

Your vehicle is not the only possible operating site. As the device does not depend on a car battery for a power supply, you can use it anywhere you have a marten problem. Protect your attic, barn, car port or garage!

Specifications

- **Frequency:** 12 – 23 kHz; approx. 65 dB
- **High voltage:** 300 V DC +/- 10 %
- **Decay time of high voltage:** up to 60 sec.
- **LED flash:** 4 times after touching the outer high voltage plates
- **Battery:** 4 x 1.5 V/DC, AAA
- **Power consumption:** 45.2 µA Standby
